***VIVIX®*** solid phenolic, engineered exterior façade panels have a decorative surface on both sides. Robust and resilient, these rigid homogeneous panels are manufactured by Formica Group, using tough thermosetting resins reinforced with cellulose fibre for added strength and durability.

An acrylic overlay provides enhanced UV protection and ***VIVIX*** panels have been rigorously tested for severe use in accordance with EN 438-6, making them ideal for applications in ventilated rainscreen façades and other external building elements.

Punga Punga Wood

*VIVIX®* by Formica Group offers you TRUE SCALE, the next generation of woods reproductions represented in the real scale of natural timber, depicting the patterns, striking veining and rich color variations of real wood across the width of the *VIVIX* panel.

In exterior, large-scale applications,TRUE SCALE gives you the effect of endless wood grain, avoiding the repetition of smaller patterns in more conventional decorative surfaces. With TRUE SCALE enjoy all the practical advantages of robust architectural panels with the exclusive look and scale of real timber, without the associated expense and maintenance issues.

**Woods** printed samples are shown at approximately 1:2 scale.
